

## GOVERNOR'S ENERGY OFFICE HOSTING FREE ENERGY WORKSHOP THIS FALL

The Governor's Energy Office is announcing a workshop aimed at promoting building energy efficiency and conservation improvement programs in Colorado. A live workshop is being presented in Trinidad Colorado this October.

The Governor's Energy Office Commercial Buildings Program provides free technical assistance to public entities engaged in comprehensive energy retrofits through performance contracting, disseminates tools and best practices and provides training and educational opportunities related to energy efficient facility upgrades.

These Live Workshops will cover the following:

- Energy Performance Contracting 101
- Engaging and self-implementing energy efficiency in small organizations/communities
- Building Re-commissioning
- Occupant behavior and its energy impact
- Case studies demonstrating successful projects across the state

This workshop targets large and small agencies interested in expanding or initiating energy programs. Public officials and facilities personnel from cities, counties, school districts, state agencies and higher education are strongly encouraged to attend. A maximum of 3 representatives may attend from a given agency.

The live workshop is scheduled for:

**Thursday, October 28<sup>th</sup>, 2010**

Trinidad State Junior College

Trinidad, Colorado

Workshop: 10am - 3 p.m.

Cost: FREE, and a free lunch will be provided
